

NPI

AUTODESK
FUSION LIFECYCLE

Fusion Lifecycle, part of Autodesk's Product Innovation Platform, includes stage-gate New Product Introduction (NPI). Improve team coordination and productivity while reducing errors and delays with program management capabilities.

Launch better products faster, with fewer surprises.

✓ NPI PROCESS MANAGEMENT

Configurable workflows coordinate and control cross-functional New Product Introduction activities. Point-and-click, drag-and-drop workflow editor makes it easy to create custom processes for improved visibility and accountability.

✓ NPI PROJECT TEMPLATES

Configurable NPI project templates standardize stage-gate milestones, deliverables and tasks by product line, business unit, product team, or other designation. Refine over time to find the right balance between flexibility and control.

✓ TASK MANAGEMENT

Project tasks are assigned and tracked in real-time to prevent bottlenecks and delays. View assignments, navigate to relevant product information and complete tasks in a single, easy-to-use dashboard.

✓ DASHBOARDS AND REPORTS

Create personalized, graphically rich dashboards and reports to monitor real-time status and trends. Export any data view, table or report with a single click.

✓ COLLABORATION

Include suppliers and customers in specific workflows governed by intelligent access control. Everyone's on the "same page" with contextual views of up-to-date product information.

✓ NOTIFICATIONS

Users are kept up-to-date with real-time alerts for task assignments, almost due, late or escalated tasks, approvals, etc. Messages are configured to optimize relevance and encourage action.

✓ SEARCH & NAVIGATION

Quickly find relevant product and process information with fast, intuitive search. View "where-used".

✓ CLOUD SOFTWARE

Fusion Lifecycle is a modern multi-tenant SaaS solution. No need for costly servers or IT support. Access from anywhere, anytime from any device using browsers or native iOS and Android apps.
