

QUALITY

AUTODESK
FUSION LIFECYCLE

Fusion Lifecycle, part of Autodesk's Product Innovation Platform, includes a closed-loop Quality Management system that connects the *complete* quality chain from Non-Conformance identification and analysis to RMA, CAPA and Engineering Change, improving product quality while reducing time-to-closure.

✓ CLOSED-LOOP QUALITY MANAGEMENT

Configurable workflows coordinate, control, and track the complete chain of cross-functional Quality processes, tied together in a single system. Modify standard workflows to accommodate your needs using an easy-to-use, drag-and-drop workflow editor.

✓ NON-CONFORMANCE (NC)

Manage incident report / issue, analysis and disposition processes.

✓ FAILURE ANALYSIS (FMEA)

Manage failure root-cause identification and verification processes.

✓ RETURN MERCHANDISE AUTHORIZATIONS (RMA)

Manage return requests, disposition, approval, repair processes.

✓ CORRECTIVE & PREVENTATIVE ACTIONS (CAPA)

Manage CAPA projects with assigned tasks. Tie CAPAs to Change Requests and Change Order implementation.

✓ SUPPLIER QUALITY (SCAR)

Track supplier quality and performance. Request and manage supplier corrective actions.

✓ DASHBOARDS AND REPORTS

Engineering and Quality are on the "same page" with consistent, real-time views of product quality / defects and change orders. Report on trends and progress towards meeting quality goals.

✓ TRACEABILITY / COMPLIANCE

Document the quality management system and record history to keep auditors at bay. Trace specific quality issues end-to-end to satisfy customer inquiries. Track electronic signatures.

✓ NOTIFICATIONS

Users are kept up-to-date with real-time alerts including assigned tasks, almost due, late or escalated tasks, approvals, changes, etc. Messages are configured to optimize relevance / action.

✓ CLOUD SOFTWARE

Fusion Lifecycle is a modern multi-tenant SaaS solution. No need for costly servers or IT support. Access from anywhere, anytime from any device using browsers or native iOS and Android apps.
