 AUTODESK®
FUSION LIFECYCLE

Product Development in High Tech and Consumer Electronics manufacturing is characterized by multi-disciplinary BOMs, extensive networks of global suppliers, and rapid product iterations/innovations to keep up with highly competitive markets. Fusion Lifecycle, a Cloud-Based PLM solution, enables you to:

-  **FACILITATE GLOBAL SUPPLIER COLLABORATION**
Lower collaboration barriers with suppliers by leveraging with access controls and security over your IP while ensuring everyone is working with up-to-date designs and documents.
-  **REDUCE ERRORS AND SPEED UP EXECUTION**
Execute an enterprise change management process for accurate product configuration and associated documents, with revision control while integrated with your ERP, Design, and Data tools.
-  **AUTOMATE NEW PRODUCT INTRODUCTION PROCESSES**
Bypass extraneous status update meetings, email, and online file sharing coordination with templated NPI workflows that ensure the right stakeholders get brought into the conversation at the right time.
-  **MEET COMPLIANCE, QUALITY, AND ENVIRONMENTAL STANDARDS**
Easily eliminate heartburn associated with meeting Industry (ROHS, REACH, Conflict Minerals etc.) or regional standards by building in traceability to all of your critical processes.

“We found that Fusion Lifecycle really provided so much more than we were getting from our previous PLM system. It provided not only BOM and Change Management, but was so much more expandable and could be used to capture other business processes”

TY HUDSON
VICE PRESIDENT OF PRODUCT DEVELOPMENT
