

# MEDICAL DEVICE MANUFACTURERS:

## INVESTIGATING THE CASE FOR A PLM SOLUTION

Medical device manufacturers are required to run validated processes, establish product traceability, and maintain tight documentation control to meet various regulations.

PLM, or "Product Lifecycle Management," helps accelerate your product development processes across all departments and locations by automating workflows, key tasks, and delivering timely information.

This helps cut costs, boost profits, meet product launch deadlines more reliably, and innovate better.

Finding the right PLM solution is more critical than ever:

62%

of firms miss product project budgets

\$\$\$

72%

of firms fail on quality goals

🏆

55%

of firms go past their planned launch date

🚀

### Fusion Lifecycle, a Cloud-Based PLM solution, enables Medical Device Manufacturers to:

#### Maintain device master record control (DMR)

Capture, track, and control the Device Master Record (DMR) across the entire organization in a central repository.

#### Manage document control and history

Distribute controlled documents, enforce standards, and manage change of your compliance documents.

#### Safeguard audits with traceability

Validate, track and control each stage of your product development with related tasks and deliverables.

#### Execute and maintain training records

Automate documentation and management of employee training records in real-time, directly link training procedures and requirements to relevant documentation.

"One of the main reasons we're using Fusion Lifecycle is to reduce risk – in terms of our product, and in terms of the ultimate result of the treatment of patients."
