

# BOM & Change Management

AUTODESK  
FUSION LIFECYCLE

Fusion Lifecycle, part of Autodesk's Product Innovation Platform, includes solutions for BOM and Change Management that bridge Engineering and Manufacturing.

Configure, access and control structured product data and related information in an easy-to-use, centralized system that saves time and money.

## BOM MANAGEMENT

Configure and manage structured Bills of Materials (BOMs) and items in a centralized system that is both powerful and easy-to-use. Authorized users quickly find the right product information.

## BOM COMPARE

Compare different BOMs and/or versions of the same BOM interactively. Visual redlines and configurable views clearly identify "what's changed".

## CHANGE MANAGEMENT

Product changes are fully defined, reviewed, approved and implemented in a collaborative environment. Follow specific change processes with pre-built or easily configured workflows.

## CLASSIFICATION

Standardize product, item and file properties to dramatically improve the ability to find and compare. Reuse or repurpose existing designs to save time and money.

## FILE MANAGEMENT

Product-related files and documents are uploaded and attached to items and BOMs ensuring that correct specifications, procedures, and drawings are used.

## COLLABORATION

Include suppliers and customers in specific workflows governed by intelligent access control. Everyone's on the "same page" with contextual views of up-to-date product information.

## SUPPLIER MANAGEMENT

Manage supplier qualification and approved supplier parts (AML/AVL) associated with product items.

## COMPLIANCE

Track compliance to regulations such as RoHS, REACH and ISO9000. Conduct systematically auditable processes that include electronic signatures.

## DASHBOARDS & REPORTS

Create personalized, graphically rich dashboards and reports to monitor real-time status and trends. Export any data view, table or report with a single click.

## SEARCH & NAVIGATION

Quickly find relevant product and process information with fast, intuitive search. View "where-used".

## INTEGRATIONS

Automatically synchronize product data throughout the organization with easy-to-build and maintain integrations with enterprise systems such as ERP & CRM.

## CLOUD SOFTWARE

Fusion Lifecycle is a modern multi-tenant SaaS solution. No need for costly servers or IT support. Access from anywhere, anytime from any device using browsers or native iOS and Android apps.

## PRODUCT INNOVATION PLATFORM

*"We found that Fusion Lifecycle really provided so much more than we were getting from our previous PLM system. It provided not only BOM and change Management, but was so much more expandable and could be used to capture other business processes."*
